

Curve Overstayer

Board Capacity Chart

The versatile Curve Overstayer board bag is designed to secure and protect anywhere from 1 to 3 surfboards against the hard knocks of travel, at a lighter weight and smaller size than most standard board bags.

In order to calculate how many boards your Curve Overstayer can hold, please review the capacity chart below.

Note: Curve Overstayer board capacity is dictated by the width of each individual board and the total combined width of your quiver. For example, the total width capacity of the 6'6" Overstayer is 60", therefore your quiver, plus any additional items that you wish to carry must total 60" or less in combined width to fit.

Some examples of different board combinations without fins are as follows:

1. 2 x Shortboard – 18.5" width each = 37"
1 x Mini-mal - 22" width each = 21"
1 x sleep mat – 1" width each = 1"
Total combined width = 60"
2. 2 x super wide fish – 23" width each = 46"
1 x sleep mat – 1" width each = 1"
Total combined width = 47"

For boards with fixed fins the maximum capacity for any size of Curve Overstayer board bag is 2 surfboards with fins.

Board Type	Overstayer 6'6	Overstayer 7'0	Overstayer 7'6	Overstayer 9'6
Shortboard	1-3 Boards (max combined width 60")	1-3 Boards (max combined width 60")	1-3 Boards (max combined width 60")	-
Mini-mal / eggs / spoons / fish	1-2 Boards (max combined width 60")	1-2 Boards (max combined width 60")	1-2 Boards (max combined width 60")	-
Longboard				1-2 Boards (max combined width 50")
